Guidedog System

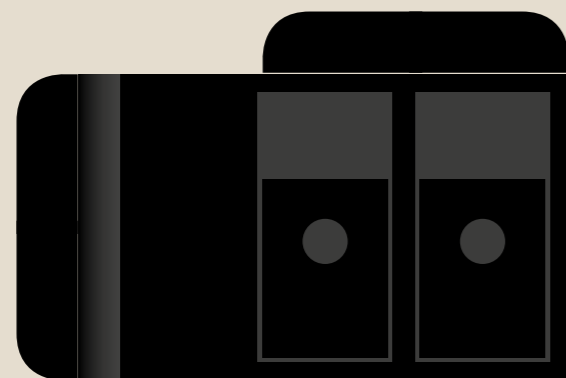

Thanks to the patented **Bloc Guidedog System**, the Easy Fit range of Bloc Blinds is the first in the world that can be fitted by complete DIY novices. With no mess, no fuss and no mistakes, you can put up your custom made Bloc Blind and adjust it to fit your window frame in under 10 minutes using only a hammer and a small screw driver. So there's no effing. Just blinding looking window blinds!

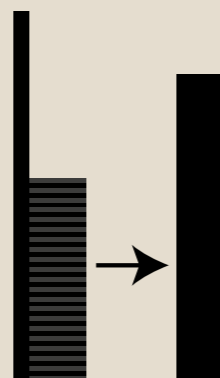

Why do I need a Bloc GuideDog System?

Did you know that most windows are a little bit wonky along the top? This makes the hanging of a blind so it looks straight on a window, quite a difficult thing to achieve.

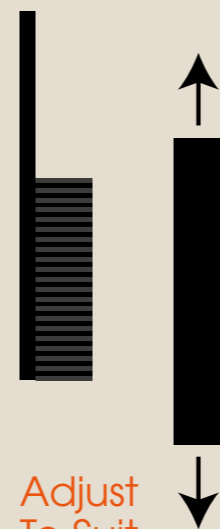

The Bloc Guide Dog is the perfect solution. This fully patented, simple device allows you to put a blind up without having to drill into your wall and it's easy to use adjustment teeth allow you to reposition by 6mm on either side to enable your blind to hang straight.

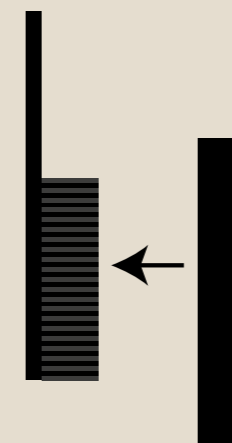

Factory Setting

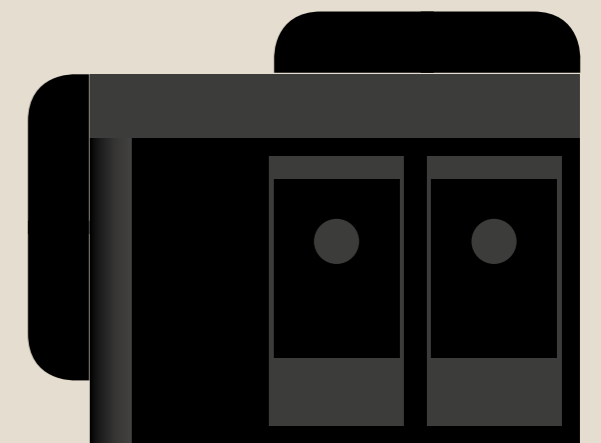

Remove Adjustable Piece

Adjust To Suit Window

Replace Adjustable Piece

The Adjustment of 3 mm is now set

With the
Bloc EasyFit Range,
putting up a blind is
now as easy as **ABC:**

Adhere the Bloc
Guide Dogs to
the wall by lining
them up as shown,
peeling off the
backing paper
and sticking them
to the clean, dry
surface of the wall.
Secure them to the
wall using the nails
provided.

Back
the blind
cassette into
the Guide
Dog and
click it into
place.

Change the
levelling of the
blind cassette (if
you need to), using
the teeth on the
Bloc Guide Dogs
and once correct
according to your
window, screw it
into place using the
attached screws.
